[Install Windows 2008 On Ibm X346 Specifications](#)

ServerGuide is an installation assistant that simplifies the process of installing and configuring Lenovo x86 servers.. It should take about 20 minutes to boot into the bios (just kidding but it will seem that way).

If I remember correctly you could change what was the focus of the boot. Its been a few years since I last touched one of these system But make sure that the boot device is pointing to the raid card.. ServerGuide goes beyond hardware configuration by assisting with the installation of your operating system, the latest system device.
